

Abstract of FR9115007

### **Improved Procedure for the Preparation of Colloidal Sulfur Solutions**

The inventor refers to

- (1) A procedure for the preparation of solutions of colloidal sulfur for the dissolution of sulfur with a solvent and the addition to the water of the solution obtained, characterized by the utilization of an intermediate solvent that increases the solubility within sulfur's solvent water or the solubility of sulfur released in water.
- (2) An execution variable to this procedure which consists on utilizing, as an intermediate solvent, a product that is at the same time a good diluter, for example, the sulfur based oils.
- (3) In the mention of new products, the sulfur solutions obtained by this procedure, before and after the dilution with water.

## **Procédé perfectionné pour la préparation de solutions de soufre colloïdal**

**Patent number:** FR915007

**Publication date:** 1946-10-24

**Inventor:** BRUNEL HENRI

**Applicant:**

**Classification:**

- international:

- european: C01B17/10

**Application number:** FRD915007 19450503

**Priority number(s):** FRT915007 19450503
